

Bayonet's Turn and Lock

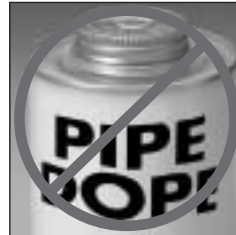

Saves Time & Eliminates Leaks

Get the Thread Out

Bayonet's patented Turn and Lock System makes tubular connections a snap. Simply place the Bayonet nut and o-ring over the pipe and a quarter turn is all it takes for a secure leak-free connection.

*no more cross
threading*

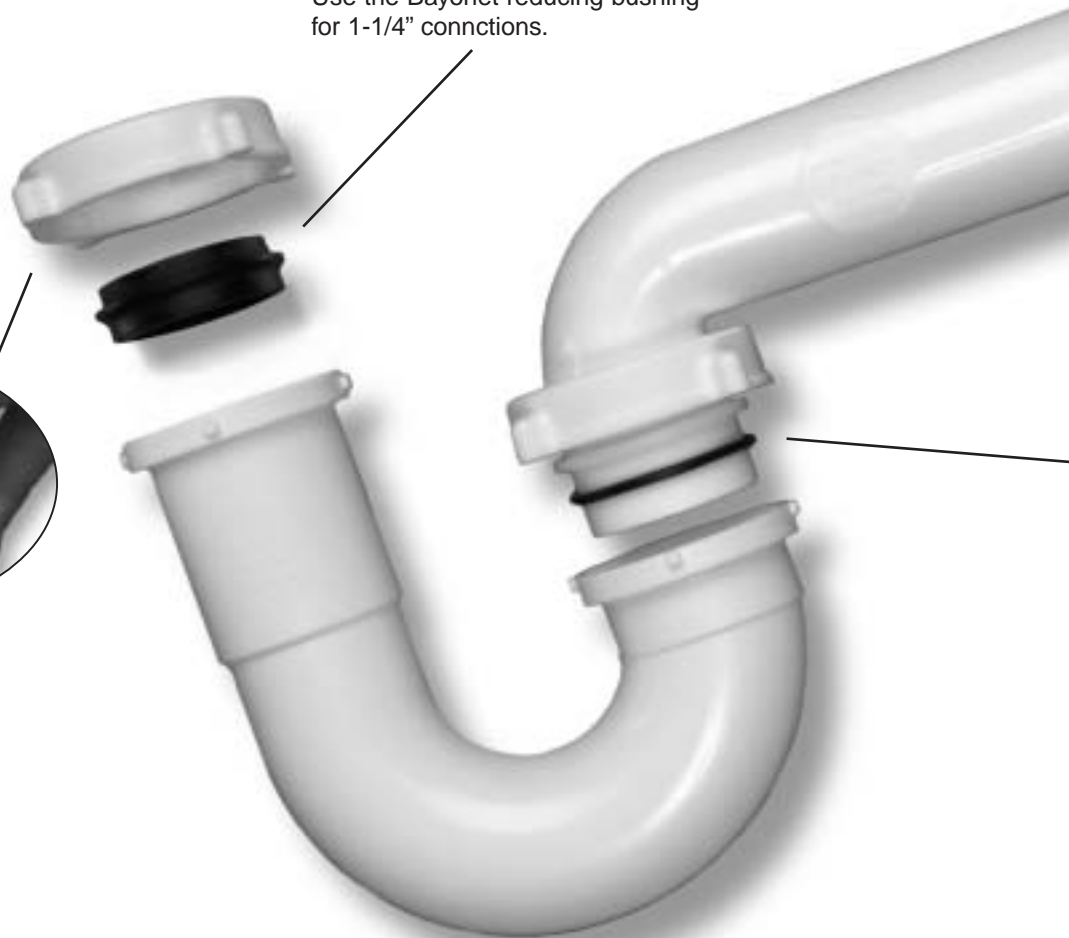

*no more messy
pipe dope*

*no more
over-tightening*

Use the Bayonet reducing bushing for 1-1/4" connections.

The large Bayonet finger grip design allows for a consistent turn.

System

Bayonet
installs in
minutes

load

turn

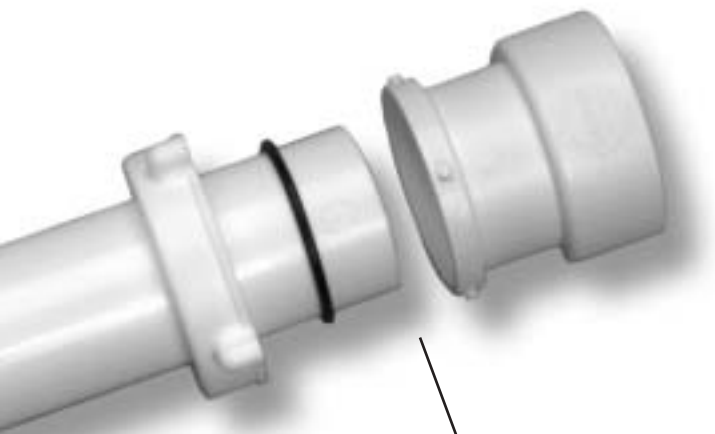

and lock

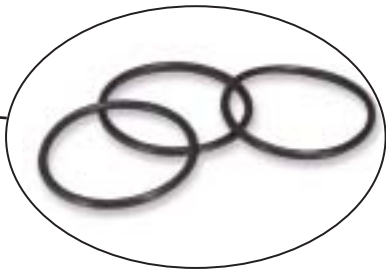

"The Bayonet P-Trap is great. We've been using them since they were introduced and have never had a leak or a call back. We've also saved money by reducing installation time. We've switched all our business to Bayonet."

Rohn Kittel, President
RTD Plumbing
Houston, Texas

Bayonet's pre-lubricated o-rings
guarantee a secure seal every time.

The tongue and groove design
guides the Bayonet nuts into
the pipe for a quick, error-free
connection.
