

#### Installation Instructions:

This unit is designed to snap fit into installed disposer flange from the top.

A. Remove only existing stopper from the disposal assembly.

B. Clean your existing disposer flange.

C. Ensure that the soft polyethylene seal provided is fitted beneath the flange.

Prior to installing your new trim, the following point should be noted:

The flange has been designed for ease of installation. However, once fully inserted, removal may prove difficult.

D. Insert flange into the existing disposer. Press firmly until engagement is achieved.

E. Now fit your new stopper/strainer inside.

### NOW AVAILABLE IN MATTE FINISHES

For matte finish, add an M to the end of the part number

Finish	Clamshell No.	Boxed No.
